## SUMMARY

- 18+ years building full-stack, distributed platforms and cloud architecture
- Deep expertise in JavaScript runtimes, Linux internals, and browser engines
- Spec-first, zero-dependency, framework-agnostic, minimal code, web standards
- Driven by automation, composability, and reducing complexity
- Modern, declarative code in Lua, JavaScript, Go, and Bash
- Functional programming, proxy patterns, and thin abstractions
- Builder of editors, window managers, multiplexers, and automation tools
- Lives in Tmux, Neovim, and AwesomeWM on bare-metal Arch Linux
- Active in Open Source world, Published over 36 notable library or app

I have passion and experience in almost every section of web development  
Out of 18 years of experience It's divided between  
frontend, backend and cloud (AWS exclusively) with titles;

- Frontend, Backend engineer
- Full stack engineer
- Principal SWE
- Senior DevOps, Solution Architect
- Head of Engineering

I didn't choose the management route and went with the Individual  
Contributor (IC) / Technical track, my past two role has been **Principal SWE**.

My true passion is tooling and automation, helping the internal  
development team with their pain points and increasing release velocity.

WORKS (11)

## OPEN-SOURCE DEVELOPER

MAY 2021 - CURRENT

[metaory](#) @ REMOTE

On hiatus; contributing to open-source. Work published under public domain on GitHub.

- Over 36 notable apps and libraries

[app](#) [automation](#) [bash](#) [ci/cd](#) [cli](#) [javascript](#) [markdown](#)  
[micro-framework](#) [npm](#) [open-source](#) [shaders](#) [web-component](#)  
[web-extension](#) [webgl](#)

## PRINCIPAL SOFTWARE ENGINEER

JUN 2025 - MAY 2026

[hampr.com.au](#) @ Australia • REMOTE

a modern logistics and operations platform streamlining periodic billing, invoicing, and fulfillment for service businesses.

- Principal engineer delivering billing/invoice/ops wins with zero regressions.
- Shaped requirements with product/ops for fast, low-friction releases.

[architecture](#) [automation](#) [aws](#) [ci/cd](#) [devops](#) [docker](#) [javascript](#)  
[json](#) [node.js](#) [platform](#) [react](#) [vanilla](#) [nextjs](#) [workflow](#)

## PRINCIPAL SOFTWARE ENGINEER

JAN 2024 - DEC 2025

[pickles.com.au](#) @ Australia • HYBRID

Pickles is Australia's leading asset remarketing platform, delivering high-volume auction and logistics solutions for vehicles, machinery, and surplus assets.

- Planned org-wide chaos drills to validate resilience
- Built k6 suites; set baselines and thresholds
- Tuned dashboards and SLOs for latency paths
- Co-authored IR playbooks and fault-injection strategies
- Shaped microservices modernization and DevOps roadmap

[Platform](#) [SRE](#) [Chaos](#) [k6](#) [Observability](#) [Node.js](#) [AWS](#) [Terraform](#)  
[CI/CD](#) [Microservices](#) [Containers](#) [Monitoring](#) [Incident Response](#) [IaC](#)

HEAD OF ENGINEERING

OCT 2023 - SEP 2024

zolomart.co @ Singapore • REMOTE

AI assistant converting WhatsApp orders to back-office systems.

- Built CI/CD pipelines
- Defined engineering strategy
- Designed scalable, fault-tolerant cloud
- Built integrations, webhooks, and APIs
- Raised code quality via reviews
- Drove product delivery
- Established guidelines and best practices
- Led team; partnered with Product and stakeholders
- Managed budgets
- Hired team to own freelancer MVP
- Set up APM and error monitoring

SENIOR DEVOPS ENGINEER

FEB 2022 - OCT 2023

respond.io @ Kuala Lumpur, Malaysia • ON-SITE

Enterprise conversational commerce platform; 10k+ companies across 86 countries.

- Designed, built, and operated core services
- Automated internal workflows
- Designed features; built prototypes
- Improved developer experience
- Built internal tooling
- Wrote IaC; automated provisioning
- Profiled and removed bottlenecks

SENIOR ARCHITECT & FULLSTACK ENGINEER

JAN 2021 - JAN 2023

hellogold.com @ Kuala Lumpur, Malaysia • REMOTE

HelloGold is a start-up that creates simple and accessible gold products for everyone.

- Led Heroku→AWS Well-Architected migration
- Built serverless webhooks
- Built serverless JSON proxy; open-sourced proxy-api-transformer
- Led and mentored team; code reviews
- Shipped features; fixed bugs
- Migrated auth to AWS Cognito

## SOLUTION ARCHITECT

JAN 2020 - APR 2021

 **pulsifi.me** @ Kuala Lumpur, Malaysia • ON-SITE

Pulsifi's People Data Platform significantly improves quality and efficiency in Talent Acquisition and Management with Predictive AI.

- Designed, built, and operated services
- Led and mentored team; code reviews
- Owned AWS infra, monitoring, automation, DRP

 AI  AWS  Architecture  CI/CD  CloudFormation  Data Masking

 DevSecOps  ETL  Node.js  Pandas  Queues  Serverless  Terraform

>>>>>>>> : : : : : >>>>>>>> : : : : : >>>>>>>> : : : : : >>>>>>>> : : : : : >>>>>>>>

## SENIOR DEVOPS & FULLSTACK ENGINEER

APR 2019 - JAN 2020

 **pulsifi.me** @ Kuala Lumpur, Malaysia • ON-SITE

- Rewrote CI/CD pipelines
- Led and mentored team; code reviews
- Containerized legacy EC2 services
- Managed AWS infra; monitoring, automation

 AI  AWS  Angular  CI/CD  NLP  Node.js  Serverless

>>>>>>>> : : : : : >>>>>>>> : : : : : >>>>>>>> : : : : : >>>>>>>> : : : : : >>>>>>>>

## SYSTEM ANALYST

OCT 2017 - MAR 2019

 **m.catchthatbus.com** @ Kuala Lumpur, Malaysia • ON-SITE

Online aggregator for intercity buses

- Owned SDLC and pipelines; redesigned infra; migrated EB→ECS/Lambda
- Solo-built CTS & PIDS on Raspberry Pi
- Built POS thermal printer driver (Electron)
- Built provider-agnostic scraper with Step Functions
- Rewrote mobile web (PWA SSR m.\*); shipped to app stores; Boost integration

 AWS  Architecture  CI/CD  Cordova  DevOps  Fintech  Linux

 Node.js  Data Mining  Integrations  Patching  Payments  SSR  Vue

>>>>>>>> : : : : : >>>>>>>> : : : : : >>>>>>>> : : : : : >>>>>>>> : : : : : >>>>>>>>

## SENIOR FULLSTACK ENGINEER

APR 2015 - OCT 2017

 **catchthatbus.com** @ Kuala Lumpur, Malaysia • ON-SITE

- Built CTB's first Node team
- Rewrote legacy stack in Node
- Built headless CMS in Node for web/native apps
- Built internal CRM and inventory dashboards

 AWS  Docker  Fintech  Linux  Node.js  DynamoDB  Electron

 Express  Performance  RDS  Redis  WebSocket

**FEB 2013 - OCT 2015**

[tractive.com.my](https://tractive.com.my) @ Kuala Lumpur, Malaysia • ON-SITE

Builds web and mobile apps and offers digital signage solutions.

- Solo-delivered fault-tolerant distributed signage platform
